MasterCard:
Fraud at chip enabled merchants down 54% since liability shift

MasterCard:
Counterfeit fraud up 77% year over year at merchants *without* chip

CNP Fraud:
Increased nearly 40% year over year from 2015-2016

FIS

**People live in a digital world.
Financial institutions must, too.**

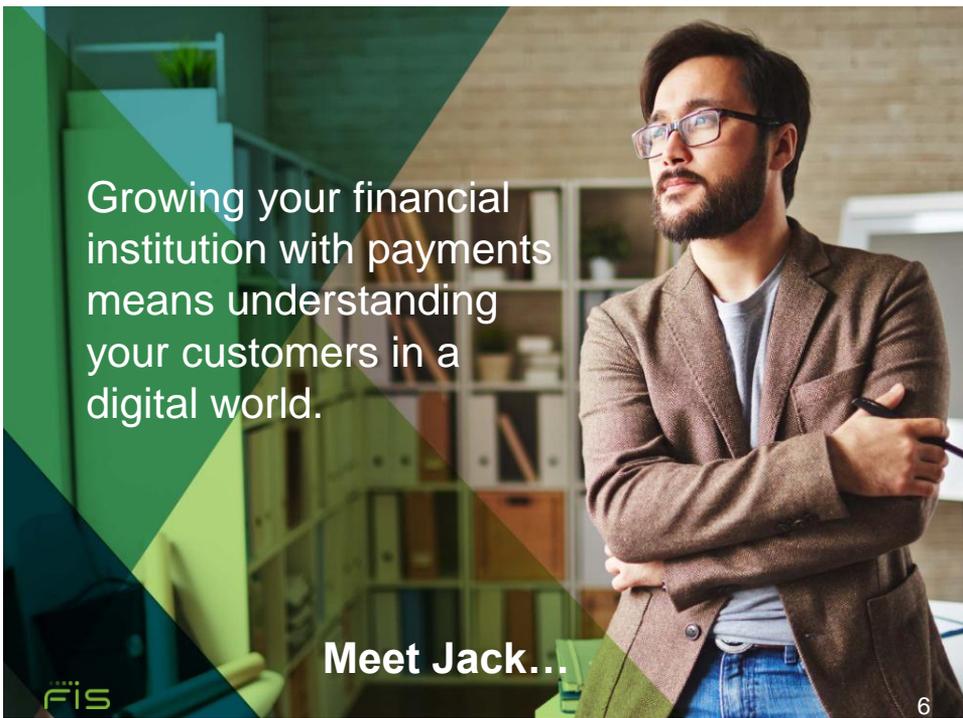

44% of bank consumers with smartphones or tablets have adopted mobile payments

Mobile app usage increases satisfaction and recommendations

84% have used mobile banking and/or transactions in the past 30 days

Growing your financial institution with payments means understanding your customers in a digital world.

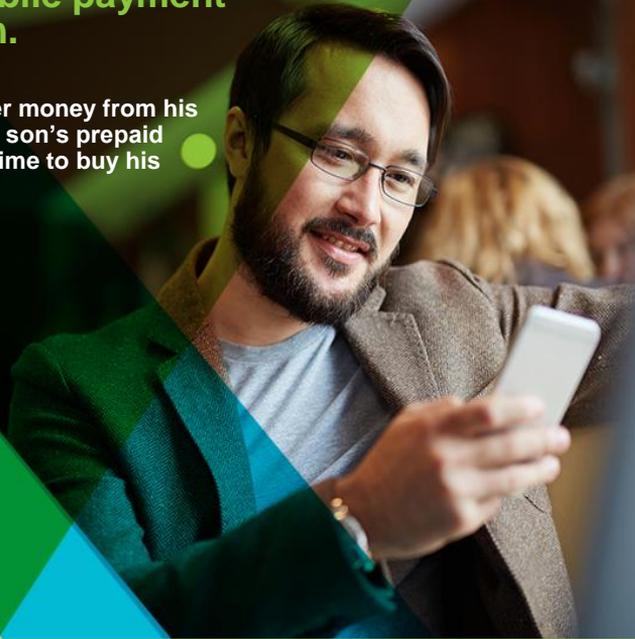

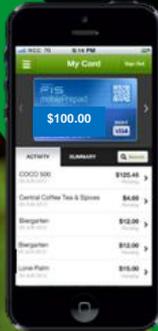

Meet Jack...

FIS

6

Offer a mobile payment application.

Jack can transfer money from his debit card to his son's prepaid account in real time to buy his school books.

Jack saved money two ways by leveraging loyalty and mobile solutions.

FIS

8

Credit cards are in high demand, especially in a digital world.

Jack's company just landed a new client and he treats the team to a celebration lunch. When the check comes, Jack reaches for his phone – paying and racking up loyalty points in a flash.

It's easier than ever to manage his credit card account and track spending digitally.

9

Help your customers protect their money.

Jack turns his card on and off when he won't be using it.

Real-time alerts let Jack know when transactions are taking place or when questionable transactions occur.

FIS

10

What lies ahead...

Looking beyond headlines to develop and deliver solutions that help you grow, innovate and manage risks

Banking-as-a-Service

Bank becomes distribution platform on which third-parties and consumers access services directly

Fintech Partnerships

Pairing secure and regulated access to transaction data mines with integrated feature-functionality experiences consumers demand

eCommerce Fraud Controls

Mobile payment app facilitates specific risk controls and authentication solutions that go beyond password and knowledge-based criterion

Future Proof Payment Strategy: Digital, Intelligent and Secure

Unlike other players in payments, financial institutions have valuable data that can differentiate the customer experience in a powerful way.

Harness the data to reduce costs and increase revenue

Reduce false positives on transaction fraud monitoring – increasing transaction revenue and reducing servicing costs.

Identify immediate sales leads based on customer purchase behaviors.
